

Anti-Human CD69-162Dy

Catalog #: 3162001B

Package Size: 100 tests

Storage: Store product at 4°C. Do not freeze.

Cross Reactivity: Cynomolgus Monkey, Rhesus, Chimpanzee, Olive Baboon, Pigtailed Macaque

Clone: FN50

Isotype: Mouse IgG1

Formulation: Antibody stabilizer with 0.05% Sodium Azide

Technical Information

Validation: Each lot of conjugated antibody is quality control tested by CyTOF[®] analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended Usage: The suggested use is 1 µl for up to 3 X 10⁶ live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human PBMCs were incubated for 6 hours in media alone (left) or with PMA and Ionomycin (right) in the presence of monensin and brefeldin A. Cells were then fixed, permeabilized, and stained with 154Sm-anti-CD45 (HI30) and 162Dy-anti-CD69 (FN50).

Description

CD69, also known as early T cell activation antigen and CLEC2C, is a transmembrane protein. It is expressed transiently on activated T cells and B cells, NK cells, and neutrophils. Expression of CD69 during early activation facilitates proliferation and differentiation into effector and memory cells. After cell division, CD69 expression can decrease.
