

Anti-Human Arginase-1-164Dy

Catalog: 3164012B

Clone: 658922

Package Size: 100 tests

Isotype: IgG2b

Storage: Store product at 4°C. Do not freeze.

Formulation: Antibody stabilizer with 0.05% Sodium Azide

Reactivity: Human

Technical Information

Validation: Each lot of conjugated antibody is quality control tested by CyTOF[®] analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended Usage: The suggested use is 1 µl for up to 3 X 10⁶ live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human HeLa cells (top) and human PBMCs (bottom) were fixed, permeabilized, and stained with 164Dy-anti-Arginase-1 (658922).

Description

Arginase-1 is a manganese-containing enzyme and belongs to the ureohydrolase family of enzymes. Arginase enzymes catalyze the fifth and final step in the urea cycle, a series of biochemical reactions in mammals during which the body disposes of harmful ammonia. Arginase-1 is located mainly in the cytoplasm of the liver. Arginase deficiency, commonly referred to as arginemia, refers to decreased function of Arginase-1. The disorder leads to neurological impairment, dementia, retardation of growth and hyperammonemia.
