

Anti-Human CD26-161Dy

Catalog: 3161015B

Package Size: 100 tests

Storage: Store product at 4°C. Do not freeze.

Reactivity: Human

Clone: BA5b

Isotype: IgG2a

Formulation: Antibody stabilizer with 0.05% Sodium Azide

Technical Information

Validation: Each lot of conjugated antibody is quality control tested by CyTOF[®] analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended Usage: The suggested use is 1 µl for up to 3 X 10⁶ live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human PBMCs stained with 161Dy-anti-CD26 (BA5b) and 141Pr-anti-CD3(UCHT1). Total viable cells are displayed in the analysis.

Description

The BA5b monoclonal antibody specifically binds to CD26, a 110 kD type II membrane protein, also known as dipeptidyl peptidase IV (DPPIV/DPP IV, DPP4) or adenosine deaminase binding protein (ADABP). CD26 is expressed by T lymphocytes and is upregulated upon activation. It is also expressed by B cells, NK cells, and macrophages. CD26 is an ectoenzyme which plays an integral role in T-cell proliferation and may interact with extracellular matrix proteins such as fibronectin or collagen, CD45 and ADA.
